

Share your passion.

When you ride Arctic Cat® snowmobiles and wear Arctic Cat Arcticwear®, you're sharing our passion for the best sleds on the planet. But it's more than that. You're sharing your passion for Arctic Cat with the rest of the world. And it's that blatant display of "This is what I ride" that separates you from the rest of the pack. Because passion isn't just some word we toss around lightly. It's a way of life. It's who we are. Passion is the heartbeat that drives us. And we proudly display that not only our sleeves, but our pants, helmets, gloves, or any number of Arctic-only accessories that'll take your ride to the next level. So what are you waiting for? Get out there and Share Your Passion.

## ARCTICWEAR 2013

We've designed our line of Arcticwear with tons of features – from functional to creature comforts. Check out the icons below and throughout the catalog to identify the features most important to you. We've made it easy to find the perfect fit to match your riding style.

- OUR PREMIUM JACKETS AND COATS FEATURE THREE IN ONE. THE INCLUDED 100-GRAM ZIP-OUT LINER PROVIDES ADDITIONAL WARMTH OR CAN BE WORN AS A STAND-ALONE JACKET.

- THESE JACKETS AND COATS FEATURE 100 GRAMS 3M™ THINSULATE™ INSULATION BUILT DIRECTLY INTO THE JACKET OR COAT. ADD ANY FLEX ZIP-OUT LINER AND ADJUST TO YOUR DESIRED LEVEL OF WARMTH.

- THESE JACKETS AND COATS ARE NOT EQUIPPED WITH 3M™ THINSULATE™ INSULATION, BUT RATHER ARE LINED WITH MESH FOR EXTRA BREATHABILITY (A FEATURE FOR YOU AGGRESSIVE RIDERS). HOWEVER, THEY ACCEPT ANY OF THE FOUR FLEX ZIP-OUT LINER OPTIONS, ALLOWING YOU TO CUSTOMIZE YOUR COMFORT LEVEL.

- WATERPROOF/BREATHABLE: A PROTECTIVE LAYER THAT KEEPS SNOW AND MOISTURE FROM CREEPING THROUGH YOUR ARCTICWEAR AND INTO YOUR LONG UNDERWEAR.

- REFLECTIVE TRIM: HIGHLY VISIBLE 3M™ SCOTCHLITE™ REFLECTIVE MATERIAL MAKES YOU VISIBLE AT DAWN, DUSK OR NIGHT. EVEN THE MAN ON THE MOON KNOWS WHERE YOU ARE.

- MAGNETIC CLOSURE: A MAGNETIC FLAP KEEPS SNOW ON THE OUTSIDE WHERE IT BELONGS.

- ZIPPERED VENTS: REGULATE YOUR BODY TEMP BY LETTING WARM AIR OUT.

- MP3 PLAYER POCKET: ADD A SOUNDTRACK TO THE RIDE WITH A CONVENIENT MP3 PLAYER POCKET WITH TANGLE-FREE NECK CORD SYSTEM. YOUR PLAYLIST WILL END LONG BEFORE YOUR RIDE.

- ZIP-OFF SUSPENDERS: ADJUSTABLE, REMOVABLE SUSPENDERS EASILY ZIP OFF TO CONVERT INTO WAIST-HIGH PANTS.

- MAKE SURE YOU'RE FULLY COVERED WITH OUR TALL JACKETS, COATS AND PANTS. FOR MEN 5'11" AND TALLER; FOR WOMEN 5'8" OR ABOVE.

- UNIQUE MICROFIBERS KEEP YOU EXTRA WARM WHEN THE TEMPERATURE IS ANYTHING BUT.

- TOUGH AND DURABLE, YOU'LL STAY WARM AND DRY THANKS TO A TEFLON®-TREATED OUTER SHELL, A WATERPROOF MIDDLE MEMBRANE AND A MICRO-MESH INNER LAYER.

- OUTSIDE ELEMENTS ARE DEFLECTED AWAY AND PERSPIRATION FILTERS OUT WHILE BODY HEAT STAYS IN.

- WATERPROOF, BREATHABLE A-TEX™ FABRIC IS DESIGNED TO BLOCK SNOW, WIND AND RAIN WHILE WICKING AWAY PERSPIRATION, SO YOU STAY DRY AND COMFORTABLE WHILE RIDING.

- 100% COTTON: THESE PRODUCTS ARE MADE OF PURE 100% COTTON.

- Exceptionally warm, bulk-free 100 grams 3M™ Thinsulate™ Insulation
- Complete versatility with three jackets/coats in one – the included 100-gram zip-out liner provides additional warmth or can be worn as a stand-alone jacket
- Waterproof, breathable, A-Tex-coated fabric with fully taped seams
- Highly visible 3M™ Scotchlite™ Reflective Material provides additional safety
- Front flap magnetic closure keeps snow from getting in
- New silver-textured fabric panels add a bold statement to your style
- Add a soundtrack to the ride with a convenient MP3 player pocket with tangle-free neck cord system
- Length of coat is 4" longer than jacket

\*\*\*Arm yourself against the cold with this handy comfort rating scale, a highly scientific, lab- and field-tested rating system developed by the footwear industry to help advise you on which boots to wear when you step out into that winter land of wonder.

Note: As with any rating system, this is more of a suggestion than a rule and should only be used as a comparison guideline, NOT an actual temperature guide. Variables affecting cold-weather protection include circulation, level of activity, presence of moisture, body temperature, windchill and outerwear.

Everything you've ever wanted in a sled can finally be on your sled.

Having an Arctic Cat sled is one thing. Customizing it every step of the way so it's your Arctic Cat sled is another thing entirely. Deck out your machine however you want. Put on new shocks. Colored hand guards, skid plates, tunnel grips, or headlight covers. Whatever you want. After all, it's your sled.

**FLOAT THROTTLE™ AVALANCHE AIRBAG**

Excavation time is the biggest contributing factor in avalanche fatalities. The Float Throttle Avalanche Airbag is designed to minimize excavation time by preventing burial. BCA airbags are both affordable and easily reusable.

- Simply pull the EZ Pull Trigger to inflate the 150-liter airbag to stay on top of the snow surface
- Excellent peripheral vision from behind-head inflation
- Does not replace the need for an avalanche beacon, probe, shovel and safety education
- Includes pressurized air cylinder
- Hazardous-shipping charges may apply
- 5.7 lbs., 22-liter capacity

All tracks listed feature an "All Open" window configuration with 2-ply construction (unless noted).

\*ACT Quiet Tracks are for use on '03 and newer models only.

Tracks listed are required for use on '07 and newer models with ACT drive and reverse. Will also fit older models.

### STUD PLACEMENT

- DO NOT use studs that are longer than recommended
- DO NOT place studs in line with the heat exchanger or tunnel protector strip, and factor in the amount of suspension travel to avoid tunnel damage
- Studs MUST NOT extend more than 3/8 in. beyond the rubber track lugs
- Verify adequate clearance between the track, tunnel and heat exchanger to avoid serious damage
- Confirm that your machine has adequate tunnel protection before installing studs
- Use only Arctic Cat-approved Stud Templates shown on page 138
- The length of carbide and number of studs must coordinate to result in balanced handling and proper control

### CAUTION

To protect the tunnel from possible damage from the studs, it is recommended that a Tunnel Protector Kit be installed on those models not so equipped

A Short Snowflap is required when installing studs on '07-'09 F Series; '09 Z1, Z1 Turbo; '09-'11 Crossfire and CFR

See your dealer for additional information

### MAXIMIZE HANDLING AND CONTROL

#### STEERING CONTROL

The length of the turning carbide (carbide inserted directly under the steering spindle) is the determining factor on steering control. The longer the turning carbide, the more positive turning becomes. Too few studs with long turning carbides can result in the situation shown in Illustration 1 below.

#### TRACTION CONTROL

The quantity and types of studs inserted through the track can have several effects. If installed improperly, track and/or stud damage can result. If the pushing force from an excessive number of studs exceeds the ability of the steering to control the force, the effect could be like that in Illustration 2. In this case, the studs tend to "push" the skis in a straight line.

### TUNE YOUR SLED'S HANDLING TO YOUR RIDING STYLE

Determining the proper traction and control is simple. What's your riding style: Are you a conservative trail rider or a performance trail rider? Look at the chart below. Find the line with the horsepower of your sled. Look under your riding category. Here you will discover the number of studs and the length of the carbide wearbar you should use. This is a baseline guide for stud and wearbar selection. See your dealer for specific model applications.

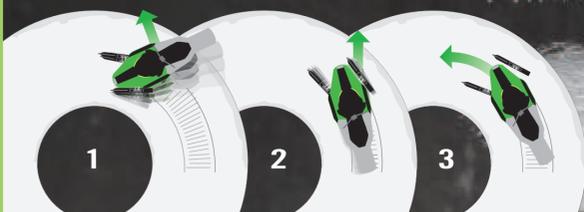

SLED	STUD QUANTITY/ INCHES OF TURNING CARBIDE		PERFORMANCE
	TRAIL	TRAIL	
50-75 HP	48/4 in.	48/6 in.	48/6 in.
75-125 HP	102/6 in.	102/6 in.	153/8 in.
125-150 HP	153/8 in.	153/8 in.	153/10 in.
150-170 HP	153/8 in.	153/8 in.	153/10 in.

FOR STUD PLACEMENT, USE ONLY ARCTIC CAT-APPROVED STUD TEMPLATES SHOWN ON PAGE 138.

Arctic Cat traction products are available in package quantities that will give you the best combinations for 121-in., 128-in. and 129-in. tracks.

TRACK LUG HEIGHT	RECOMMENDED STUD LENGTH (IN.)		STUD BOY STUD LENGTH
	WOODY'S STUD LENGTH	WOODY'S STUD LENGTH	
1.000	1.075	1.080	1.080
1.250	1.325	1.375	1.375
1.352	1.325	1.375	1.375
1.375	1.450	1.500	1.500

For stud lengths 1.325 in. and longer, we recommend the use of a Big Nut (page 137) or Power Tower Support Nut (page 138).

1. BACK END LOOSE. TOO MUCH CARBIDE, NOT ENOUGH STEERING CONTROL.
2. FRONT END PUSHES. WEAK STEERING FROM WORN WEARBARS, TURNING CARBIDES TOO SHORT OR OVERSTUDDING ON TRACK.
3. STEERING CONTROL AND STUD QUANTITY ARE IN BALANCE FOR PROPER SETUP.

**WOODY'S LIMITED WARRANTY**

International Engineering & Manufacturing, Inc. warrants each product manufactured by it to be free from defects in material and workmanship under use for the purpose for which it is intended. The Company shall not be liable for damage or delays caused by defective materials or workmanship; is limited to the repair or replacement at its factory of defective article or part thereof, which may be returned to the factory, transportation charges, prepaid within one (1) year after delivery to the original purchaser. Proof of purchase is also required. The Company shall be the sole judge of the existence of any defect in the article so returned. No claims for charges incurred in the removal, disassembly or reinstallation of such article shall be allowed. Product manufactured for consumer use on snowmobiles is designed for snow or ice only; use on any other surface voids warranty.

This Warranty shall not cover any article which has been misused or neglected or damaged by accident or any article which has been altered outside the Company's factory. The Warranty for studs is void unless the studs are installed with Woody's installation tools, support plates and lock nuts; according to the recommendations set forth in Woody's Instructions and Template Patterns. This Warranty does not cover bending, chipping, flaking or carbide pin breakage or pin loss from stud wear, stud replacement labor or shipping.

The Company shall, in no event, be liable for consequential damage or contingent liability arising out of any total or partial failure to function of any article manufactured by it or of any equipment on or in which it is used. Failure of a user to give notice to claim as to defect claimed under the provisions of the Warranty within one (1) year after delivery to original use, such claim shall constitute a waiver by consumer of all claims with respect to goods and equipment.

No express, implied, or statutory warranty other than that herein set forth is made or authorized to be made by the Company. All returned warranties will not be accepted without a return authorization number.

**WOODY'S MANUFACTURER WARRANTY RETURNS**

Call our customer service department for a Return Authorization Number. This number must be visible on the outside of the box. The product must be inspected by a Woody's technician to determine if the product is defective due to material, quality or workmanship before a final warranty determination is made. Proof of purchase is required. All returns to the manufacturer are for exchange only.

## 2-CYCLE OILS

### APV SYNTHETIC IS THE BEST 2-CYCLE OIL YOU CAN GET FOR YOUR ARCTIC CAT!

We spend thousands of hours testing 2-cycle oils only in Arctic Cat engines. We dyno test many formulations, and eventually we narrow the best-performing candidates down and expose them to the final test – our field test drivers. Ultimately, one unique formulation emerges. This is proven to be the best oil for all your Arctic Cat snowmobiles.

#### ARCTIC CAT APV SYNTHETIC OIL

Our APV™ Synthetic Oil stands alone as the best, most performance-oriented lubrication you could possibly put through your sled. Given your commitment to the highest level of riding possible, the best oil for the dollar guarantees flawless engine operation.

- The ultimate in performance oil for Arctic Power Valve™ engines and all Arctic Cat 2-cycle engines
- Protects against engine wear with excellent lubricity
- Increases efficiency and maintains Arctic Power Valve cleanliness
- Smokeless formulation burns extremely clean with a fresher scent
- Prevents piston scuffing, varnish formation and deposit buildup
- Improved cold-weather startup with prime lubrication

Quart: 4639-349    Gallon: 5639-469    2.5 Gallons: 4639-347

#### ARCTIC CAT FORMULA SS SEMI-SYNTHETIC OIL

Our Formula SS Semi-Synthetic oil offers you the benefits of a semi-synthetic formulation at a phenomenal value.

- Use in ALL Arctic Cat 2-cycle engines, including Arctic Power Valve engines
- Smokeless formulation burns clean
- Provides power valve cleanliness
- Protects your engine against wear, scuffing and varnish formation

Quart: 5639-470    Gallon: 5639-471    2.5 Gallons: 5639-472

#### FORMULA 50 OIL

- Recommended for non-Arctic Power Valve 2-cycle engines
- Performs well over a wide range of operating conditions
- Minimizes engine wear
- Prevents rust/deposit formation

Quart: 5639-475  
Gallon: 5639-476  
2.5 Gallons: 5639-477

## OIL AND CARE

## 4-CYCLE OILS

Arctic Cat Synthetic 0W-40 engine oil is the ONLY oil that's been designed specifically for Arctic Cat 4-cycle snowmobiles. It is the ONLY oil that has been exhaustively field-tested in ALL Arctic Cat 4-cycle snowmobiles and ultimately secured engineering approval. This custom synthetic formulation allows your engine to deliver optimum performance and protects it in all operating conditions, including turbocharged models with extreme horsepower output.

*Send your machine to the oil spa.*

#### SYNTHETIC 0W-40 OIL

- Provides superior performance in ALL operating conditions
- Synthetic base stocks offer high lubricity that protects engine from wear and scuffing
- Premium additive package helps prevent deposit formations, ring sticking and plug fouling while providing oxidation stability
- For use in ALL Arctic Cat 4-cycle snowmobiles

Quart: 5639-172    Gallon: 5639-173

#### SYNTHETIC OIL CHANGE KIT

-Includes gallon of Synthetic 0W-40 oil, filter, belly pan plugs, washer and disposable funnel

- Showroom-quality shine
- Resists finger markings
- Greaseless finish

16 oz.: 5639-849

## BELTS

### BELTS

- Custom fit to match each Arctic Cat sled and specific use
- Better contact with clutch surface and faster acceleration from double cogs
- Increased belt life by running 15° cooler than aftermarket belts
- Reinforced with Aramax® aramid fibers for huge strength and durability
- Increased power transmission and less slip from aramid-fiber rubber compounds

Kevlar Drive belts available for F, M and XF models, which:

- Dramatically extend belt life
- Sustain belt length better than steel cords
- Note: Proper break-in period required

**PREMIUM ARCTIC CAT "EXTENDED-LIFE" ORIGINAL EQUIPMENT REPLACEMENT BELTS**  
Don't settle for anything less than a drive belt built specifically for your sled. Proven through extensive lab and field testing, original equipment Arctic Cat replacement belts are precision-engineered for each Arctic Cat snowmobile.

#### CUSTOM-ENGINEERED FIT

While non-OEM aftermarket belts offer "one construction fits all," Arctic Cat Research & Development "custom-engineers" each genuine Arctic Cat belt to match the specific performance characteristics of your sled. This produces the best combination of strength, durability and responsiveness for lower-horsepower, fan-cooled sleds all the way up to high-horsepower muscled sleds. Each one is built using only the finest materials, incorporating precision manufacturing techniques to meet exacting tolerances.

#### TOP & BOTTOM COGS

Arctic Cat original equipment belts are double coggled, so more of the belt contacts the clutch surfaces. This results in faster acceleration, maximum efficiency and superb overall performance. Double-cog design provides a larger surface area for greater cooling and longer life. In fact, this belt runs up to 15° cooler than flat-top aftermarket belts.

**ARAMAX HIGH-MODULUS (LOW-STRETCH) ARAMID-FIBER TENSILE MEMBER**  
The Aramax inner cord provides incredible strength and durability for high-horsepower, high-performance sleds. In addition, each belt is reinforced with top-grade, high-flexibility, shock-resistant Aramax aramid-fiber cords, and chemically treated for maximum power transmission and length stability.

**HIGH-PERFORMANCE PREMIUM COMPOUNDS**  
Arctic Cat's OEM belts incorporate advanced "premium" compound materials that ensure optimum belt performance under all riding conditions. The advanced aramid-fiber-loaded rubber compound resists wear and delivers consistent power while minimizing slippage over a broad range of operating temperatures. The thicker, highly flexible design increases grip to clutch surfaces for increased power transmission.

#### ARCTIC CAT KEVLAR DRIVE BELTS

These ultimate-performance Arctic Cat Kevlar drive belts are custom-engineered for F, M and XF models. Extended-life belts feature top- and bottom-molded cog construction and high-performance compounds. Inside, the Kevlar cord provides increased belt life and sustains belt length better than steel cords. Please note that proper belt "break-in" is required.

Snowmobiling is serious fun. Be sure to read and understand your owner's manual and please pay special attention to the safety instructions. Arctic Cat, Inc. endorses and encourages the safe use of all snowmobiles. Be careful, you can get hurt. Wear a helmet and don't drink and ride. Be aware of natural hazards you may encounter, allow yourself plenty of room to safely stop your snowmobile under all conditions, and maintain your equipment. Your safety is in your hands, so take care. All scenes depicted or described in this brochure were performed by professional riders under carefully controlled conditions. Leave the fancy riding to the pros; they practice for years and train very hard to make it look easy. Never attempt to duplicate these maneuvers or encourage others to do so. We care about your safety and enjoyment of the sport. All materials and specifications are subject to change without notice.
